Has the Bible Been Corrupted? Seminar

How often have you heard people say—

“You can’t be sure you have the Bible in its original form.”

“The Bible has lots of errors and mistakes since it was written and transmitted over several thousand years.”

“Look at how many translations there are—and they all differ with each another.”

Skeptics, atheists, and modernists have waged an aggressive war against the Bible for over a century.

They have succeeded in undermining public confidence in the authenticity of the text of the Bible.

The faith of our young people who attend state universities has been seriously eroded.

THE SEMINAR ADDRESSES SUCH QUESTIONS AS:

How do we know the Bible was transmitted accurately?

How much manuscript evidence do we have for the Bible?

Do we have the original autograph copies of the Bible?

How can we be sure we have the Bible as God intended it?

How do we know how the original Bible read?

Is Mark 16:9-20 supposed to be in the Bible?
