# Scripture, Science, and Common Sense: Three Votes for God

*A Seminar that Examines the Amazing Evidence for the Existence of God*

The most basic question that a person could ever ask is: "Where did the Universe and everything in it (including oneself) come from?" From whence came the heavens and the Earth, light and life, good and evil? Did God supernaturally create everything out of nothing? Or, did the Universe and everything in it come about because of a mindless, accidental Big Bang billions of years ago?

Reason, common sense, and true science demand a logical explanation to these and other critical questions. How can we know that God exists? What does atheism look like when taken to its logical conclusion? Did mere man author the Bible or does it demand a greater explanation?

Come and hear Eric Lyons as he expounds upon what Scripture, science, and common sense have to say about the evidence for the Creator.
